

Keynote Speaker

Dr. Almerima Jamakovic-Kapic, EMBA, leads AI transformation at Swisscom's Infrastructure & Networks, bringing AI into Switzerland's critical infrastructure - the backbone that keeps society and the economy connected and evolving.

With more than 15 years of experience in technology, engineering, innovation, and leadership roles, she turns complex business and operational challenges into scalable AI solutions, strategic value, and lasting organisational transformation. Her work connects deep technical expertise with executive-level strategy, helping organizations move from AI ambition to measurable impact.

Speakers - Session 1

Snježana Köpruner is an entrepreneur and mechanical engineer with extensive professional experience in Germany and Bosnia and Herzegovina. After graduating in mechanical engineering in Zagreb, she worked in the industrial sector in both Croatia and Germany, specializing in production management and industrial development.

In 2004, she took over GS-TMT factory in Travnik and transformed it into a successful export-oriented manufacturing company. In the meantime, she also established a factory in Prozor-Rama, and her companies today employ around 700 workers in total. She is widely recognized for her commitment to industrial development, employee welfare, and socially responsible business practices in Bosnia and Herzegovina.

Vjekoslav Vuković, PhD, born in 1973, has built a distinguished professional career through holding a number of responsible and high-level positions in the security sector, and currently serves as one of the three leading officials of the Foreign Trade Chamber of Bosnia and Herzegovina.

Upon assuming this position, he directed his efforts towards strengthening economic diplomacy, with the aim of ensuring high-quality international representation of Bosnia and Herzegovina and promoting its economic potential. Since 2017, he has been a member of the Board of Directors of Eurochambres, and during his career, he has also served as a member of the Board of Directors of FIPA. He is the initiator and driving force behind numerous projects aimed at improving the business environment and attracting investments, thereby actively contributing to the economic development of Bosnia and Herzegovina. He is the author of several scientific and professional papers in the field of regulation of artificial intelligence, and co-author of the university textbook *Victimology*.

Lorenz Schaffner is Founder and Managing Director of Integris Group.

With a background in manufacturing and quality management, he has lived and worked in Bosnia and Herzegovina for over 15 years and has founded and led projects and companies in the region. Today he supports Swiss entrepreneurs looking to invest, outsource or expand in the Western Balkans. His focus lies on strengthening economic ties between Switzerland and Bosnia and Herzegovina, bridging two cultures and business environments.

Suad Sinančević is General Manager of Sika Bosnia and Herzegovina, part of the global Sika Group, a leading company in specialty chemicals for construction and industry.

He has extensive experience in business development, construction solutions and market expansion, with a strong focus on innovation, sustainability and long-term partnerships in the construction sector.

He also initiated the establishment of local production operations in Bosnia and Herzegovina, contributing to the strengthening of the country's industrial and construction sector capacities. Under his leadership, Sika Bosnia and Herzegovina continues to expand its local presence and promote modern and sustainable construction practices in the region.

Speakers - Session 2

Taner Alicehic is a Swiss and Bosnian citizen and residing in Baar, Switzerland.

Mr. Taner Alicehic is a co-founder, advisor and shareholder of Stoneweg SA, the asset manager of real estate investments. He is also the founder and CEO of REIS Partners SA as well as chairman or board member of several Swiss companies.

Prior to 2008, he worked as head of investment strategies for real estate, fixed income as well as foreign exchange markets for Banque Cantonale Vaudoise. Mr. Alicehic holds a master degree in physics from Ecole Polytechnique de Lausanne, Switzerland as well as a MBA from HEC of University of Geneva, Switzerland.

Mirko Gadza is Chief Product Officer (CPO) of the SCHILLER Group and CEO of Ganshorn Medizin Electronic GmbH and ERGOSANA d.o.o.

He has more than 25 years of experience in the medical technology industry and is actively involved in building and expanding production and development activities in Bosnia and Herzegovina.

His focus lies on innovation, international growth, quality management and strengthening economic cooperation between Bosnia and Herzegovina and Switzerland.

Damjan Dubočanin, co-founder and Deputy General Manager of MPO d.o.o. Damjan brings 18 years of extensive experience in mechanical manufacturing, including 14 years as a company owner and production manager. After completing his education in Switzerland, he co-founded MPO d.o.o. with a clear vision: to bring Swiss manufacturing excellence and quality standards to Bosnia and Herzegovina. Since 2014 the company has established itself as a highly trusted outsourcing partner for the demanding Swiss market. Damjan is deeply committed to workforce development and continuous training, teaching the same practices he was taught during his apprenticeship. His primary goal for the future is introducing a Swiss-style dual-education system to foster and elevate young talent in mechanical engineering.

Haris Hotic completed his education in Switzerland through the dual education system, gaining strong technical and practical expertise in manufacturing and business operations. After finishing his education, he decided to pursue private entrepreneurship, initially starting in trade and resale businesses. However, driven by his technical knowledge, he soon transitioned into production and manufacturing. With a vision to build visible and meaningful projects that leave a lasting impact, Haris invested in Bosnia and Herzegovina, specializing in the production of modular and prefabricated buildings, and combining Swiss work standards, precision, and quality with local production capacities.
